Key Projects

Lyvup

- A digital therapy platform focused on accessible and affordable healthcare. It provides innovative digital therapies that align with individual needs, allowing patients to receive care from home and promoting treatment adherence.
- TECH STACK: React, Bootstrap, Node, Express, MYSQL, Redux, AWS

Ordant

- A Next-Gen Cloud-Based platform for managing print businesses. It integrates powerful, customizable modules to replace disconnected data silos, streamlining operations from start to finish.
- TECH STACK: Vue.js, Node.js, PostgreSQL, Pinia, TypeScript, Tailwind CSS, AWS

POS System

- A comprehensive point-of-sale system combining hardware and software to facilitate in-person and virtual sales, payment processing, and direct bank routing.
- TECH STACK: Vue.js, Nuxt.js, Quasar, Pinia, TypeScript, Node.js, Express.js, MongoDB, AWS, Payment Gateway

Park Smart

- An innovative parking management solution offering a roadmap for parking facilities to use sustainable strategies, complementing LEED and other certifications.
- TECH STACK: Vue.js, Quasar, Node.js, Pinia, PostgreSQL, Google Maps, Payment Gateway, AWS, Azure

Cough Drop

- An open-source Augmentative and Alternative Communication (AAC) software designed to help individuals with complex communication needs be heard through adaptable technology.
- TECH STACK: Vue.js, Vuetify, Pinia, TypeScript, Python, Flask, AI/ML, Eye Gaze, Google Maps, Payment Gateway

Social Angel

- A community platform fostering impactful progress by uniting donors and volunteers globally to support essential resources and lasting change.
- TECH STACK: Vue.js, Tailwind CSS, Pinia, Node.js, Firebase, Stripe

School Dash

- Streamlined administrative tasks for educational institutions, specializing in enrollment, attendance tracking, and grading to enhance the learning experience.
- TECH STACK: React.js, Material UI, Node.js, Express.js, MongoDB, Redux

ICAssist

- An intelligent AI-powered chatbot platform designed to streamline corporate data retrieval. It enables users to interact naturally with the system to ask complex questions and instantly extract precise financial and operational insights from a specific company's quarterly and yearly reports.
- **TECH STACK:** React.js, Python (Flask), Azure, AWS, Dataiku

AutoLit

- A comprehensive data reporting and analytics platform designed for the healthcare sector. It empowers users to generate customized health reports based on specific therapeutic areas and medical conditions. The system automates data delivery, allowing users to schedule and receive daily, weekly, or monthly reports directly via email, ensuring seamless monitoring and data-driven insights.
- **TECH STACK:** Vue.js, TypeScript, Dataiku, Python (Flask), AWS, Azure, Bitbucket

ItServiceDesk

- An internal IT administrative suite and service desk application designed to streamline organizational operations. It features an automated ticketing system and asset inventory management, enabling seamless issue resolution, user acceptance testing (UAT) tracking, and automated email notifications via SMTP integration.
- **TECH STACK:** Next.js, AWS, SMTP, Python, PostgreSQL
